

J-Bevel Stinger Bead ECAP® Encapsulated

Threaded Knot Wheel Brush

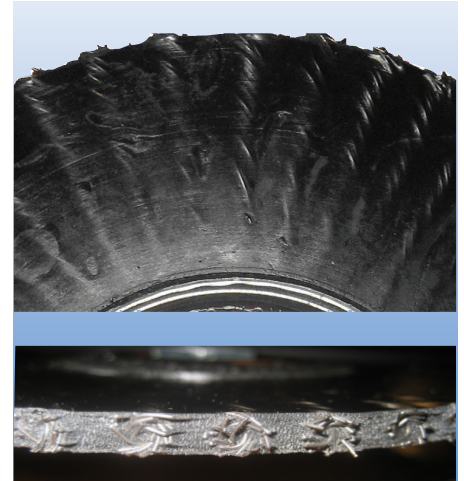

NEW!

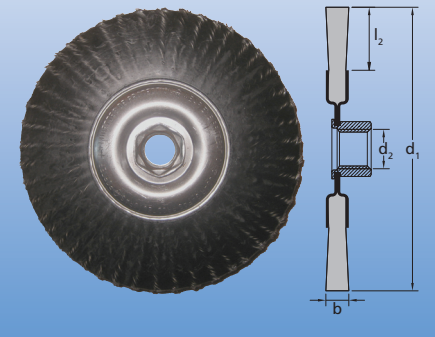

PFERD/ADVANCE BRUSH is pleased to announce the introduction of the new J- Bevel brush, specifically designed for use on narrow pipe bevels required for automatic pipe welding systems.

ECAP® Encapsulation

- ECAP® Twist Knots: The tightly twisted and Encapsulated wire knots allows this tool to remove heavy scale, rust and other contamination easily during every step of the automatic welding process.
- Wire is bonded in a synthetic elastomer material which firmly supports the wire filaments, providing precisely controlled brush face, longer brush life and very aggressive removal rates. Limited flexibility.
- E4 is good for higher pressure applications. Black colour.

J-Bevel Brush, Stringer Bead Twist, ECAP® Encapsulated

This 5" diameter encapsulated stringer bead wheel is ideal for cleaning welds and bevels created by automatic orbital welding equipment. Features extra-long 1-1/4" trim length, allowing the brush to reach into tight bevels used by automatic welders, even on heavy wall pipe. The narrow 3/16" wide brush face is designed to reach deep into bevels to clean out contamination beginning with the first weld bead.

Recommendation for Use

For use with automatic orbital welding equipment.
